

PLANET EARTH

Saint David's Class

Topic web - Autumn 1

Maths

Place value, written methods for addition, subtraction, multiplication and division and fractions to ensure fluency and efficiency in arithmetic

English

Journey tales through different environments and report writing - both of these genres will link closely to our topic of Planet Earth Weekly grammar lessons will also take place.

RE

Creation will be our main unit this term which again links to our class topic.

Computing

Within our computing lessons this term, we will be looking at E-safety and sharing our experiences through blogging. Look out for the updates on our class blog!

French

We will be learning conversational phrases and building on previous vocabulary learnt.

PHSE

Our lessons will look at self-belief and resilience, which is linked closely to our school vision and ethos. This will also be linked to becoming the best possible independent learners.

Topic related learning - Planet Earth

Our new curriculum has the aim to incorporate many subjects into one lesson with a whole range of cross-curricular links. We will be scientists, geographers and explorers and use all of this to create writing linked closely to our topic learning.

We will be exploring different habitats, environments and how animals adapt to survive in these. Also, we will examine how plants and animals are classified by scientists and have a go at doing this ourselves

All of this will be linked to improving our map reading and geographical skills. We will also look at how humans are damaging our Earth and what can be done to help prevent this.
