## Climate Education

My name is Harry and I am the Sustainability Project Lead for the Little Way Catholic Educational Trust. We are asked, as God's children, to take care of the World in which we live so that it is here for future generations. Part of my job is to work with schools and their families to educate everyone to look after our world better. Through this newsletter, I am going to be sharing a range of information to help you to do this and keep you updated about the things we're doing in our schools to make them more sustainable. Each edition will align with one of the government's climate goals: Decarbonisation, Climate Education, Climate Adaptation, and Biodiversity. This edition will focus on climate education.

I'm sure you've seen things in the news about rising sea levels and our changing weather. But, have you ever heard about the bleaching of coral reefs or the endangerment of animals such as the flying fox? All of this is caused by us in our fossil fuel reliant society! To learn more about these and the effect we're having, pop a date in your diary to watch these two documentaries **with** your children (due to content, suggest KS2 and above):

### Climate Change– The Facts (BBC)

<https://www.bbc.co.uk/programmes/m00049b1>

### Breaking Boundaries (Netflix)

<https://www.netflix.com/title/81336476>

If you have any questions, ideas, or concerns about sustainability in our schools, communities, or globally, please feel free to contact me through my email: [sustainability@lwcet.co.uk](mailto:sustainability@lwcet.co.uk)

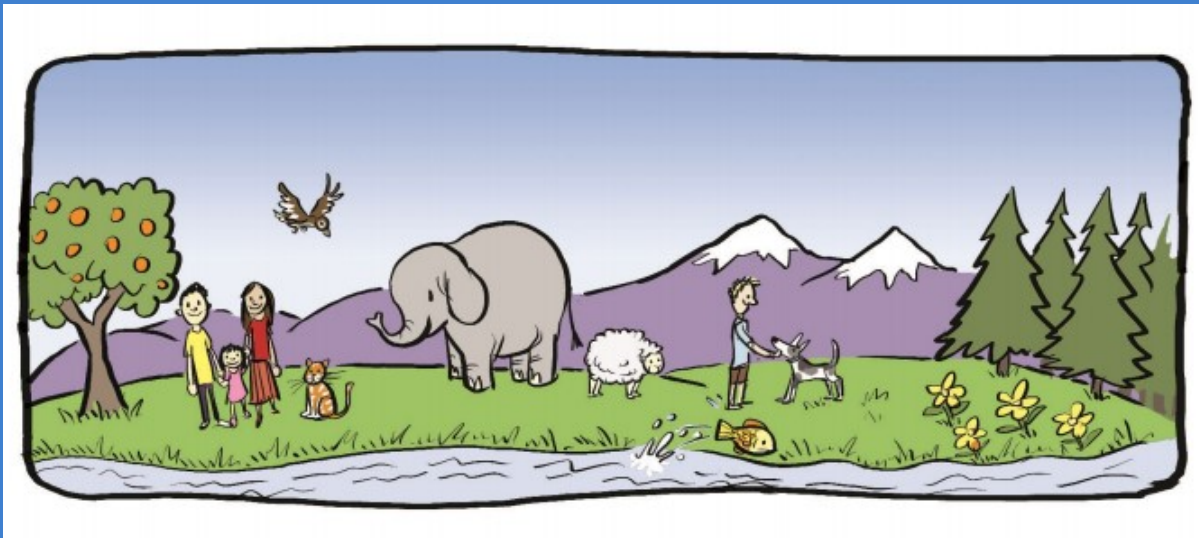

## Little acts, great love, big difference

Climate Change—The Facts focuses on the current impacts of climate change and what our future could look like. Breaking Boundaries explores the 9 planetary boundaries and explains which ones we have crossed and what we need to do to lessen our impact.

Both are PG rated, and so you may want to watch them by yourself first before you watch them with your children.

If you get a chance to watch one (or both), I would love to know what you thought! You can contact me through my email: [sustainability@lwcet.co.uk](mailto:sustainability@lwcet.co.uk)

## Care and Protection of God's Creation

### Stewardship of Creation

“The earth and all life on it is God’s creation; it is His gift to us. ***We show our love to God by taking care of the earth and protecting the planet and its people.*** We must live in harmony with creation and remember our responsibility to help our world to thrive.”
